

HOW TO EXPAND THE OUTLINE OF AN OBJECT IN COREL DRAW,

- TO GO AROUND AN OPENING IN GUNNAR SPT32.

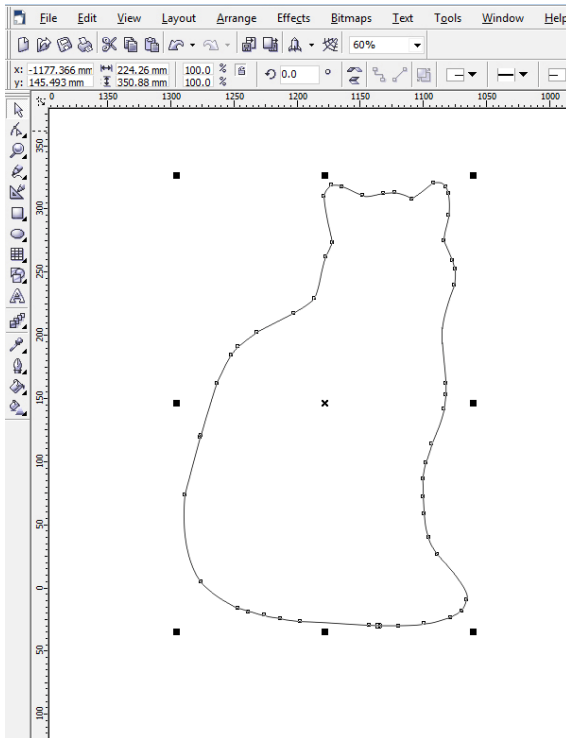

1. Starting with the basic shape which you have already created and “cleaned up”.

2. On the vertical toolbar on the left hand side, select the **outline tool**  and expand the menu, and select the “**hairline outline**” option:

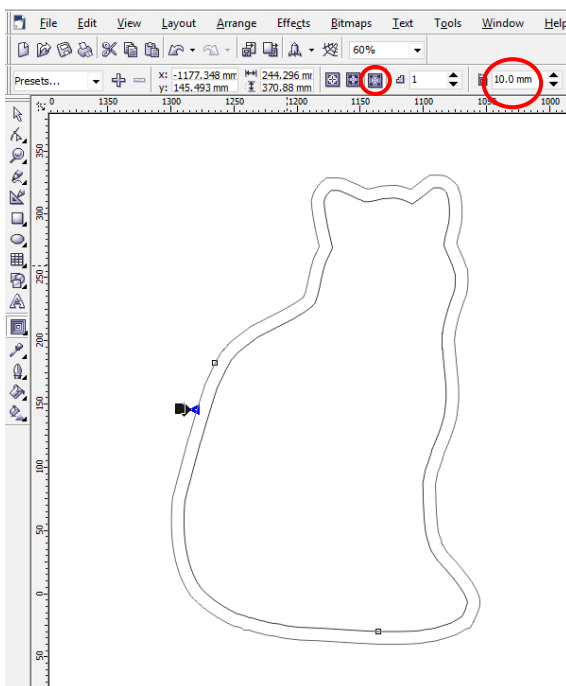

3. On the vertical toolbar on the left hand side, find the **fill tool**  and expand the menu, and select “**no fill**” option to remove the fill:

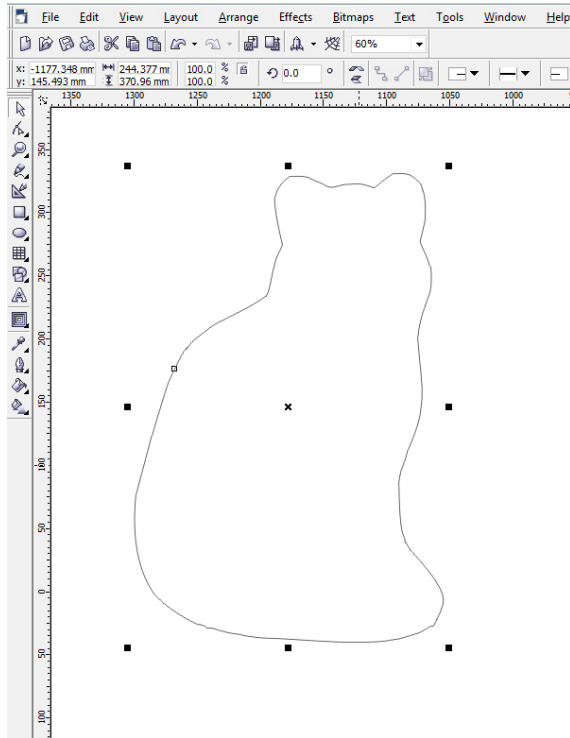

4. On the vertical toolbar on the left hand side, find the **interactive menu**  and expand the menu, and select “**interactive contour tool**”:

5. On the toolbar at the top of the screen, Adjust the **contour to outside** option and the **contour offset** value, and apply it to the shape.

6. On the vertical toolbar on the left hand side, select the object with the **pick tool**  and then go to the **Arrange** on the Menu Bar at the top of the screen, and select "**Break Contour Group Apart**" (CTRL K).
7. Then you can select and delete the smaller opening, keeping the larger one.

8. Enlarge the figure as big as possible (min 4 times more than original size).
9. Select all and copy to clipboard (Ctrl C) which you can now & paste into SPT32.
